

Lumina Chronica

Master Project Bible

AI Development Specification

Version: 1.0

Status: Planning / Foundation Document

Project Type: Digital Library & Creative Knowledge Platform

Repository Model: Public Repository, Controlled Development

0. AI CONTEXT INSTRUCTION

Purpose of this document

This document defines the complete vision, requirements, architecture principles, design philosophy and development rules for the project:

Lumina Chronica

Any AI, developer or contributor working on this project should treat this document as the primary source of truth.

The goal is not to create a simple ebook reader.

Lumina Chronica is intended to become a complete digital ecosystem combining:

- personal digital library
 - ebook reading experience
 - knowledge organization
 - creative worldbuilding
 - community platform
 - AI-assisted reading and creation tools
-

0.1 Important instruction for AI assistants

When assisting with Lumina Chronica:

Always prioritize:

1. Core reading experience
2. Library management

3. Personal organization
 4. Creative projects/worldbuilding
 5. Statistics
 6. Community features
 7. AI features
 8. Additional convenience features
-

Never sacrifice:

- usability
- simplicity
- privacy
- maintainability
- scalability

for unnecessary complexity.

When uncertain:

Do not immediately introduce new technologies or redesign existing concepts.

Instead:

1. Check existing project principles.
 2. Prefer simple solutions.
 3. Keep future expansion possible.
 4. Explain important architectural decisions.
-

1. PROJECT IDENTITY

1.1 Project Name

Lumina Chronica

1.2 Meaning of the Name

Lumina Chronica combines two Latin-inspired concepts.

Lumina

Meaning:

Light, illumination, knowledge, discovery.

Represents:

- learning
 - inspiration
 - curiosity
 - understanding
 - exploration
-

Chronica

Meaning:

Chronicle, record, history.

Represents:

- books
 - stories
 - memories
 - documentation
 - preserved knowledge
-

Combined Meaning

Lumina Chronica represents:

A place where knowledge, stories and personal creations are preserved and illuminated.

1.3 Project Motto

Possible official slogans:

Main:

Where stories become knowledge and knowledge becomes worlds.

Alternative:

Your books. Your stories. Your worlds.

Alternative:

A digital archive for imagination and knowledge.

2. PROJECT VISION

2.1 Long-term Vision

Lumina Chronica should become a personal digital library and creative archive.

Every user should have a place where they can:

- collect books
 - read comfortably
 - organize knowledge
 - create worlds
 - write stories
 - share creations
 - discover content from others
-

The final vision is a combination of:

```
Digital Library
+
Personal Knowledge Management
+
Worldbuilding Platform
+
Creative Archive
+
Community
+
AI Assistant
```

3. WHAT LUMINA CHRONICA IS

Lumina Chronica is:

A digital library

Users can:

- upload books

- organize books
 - read books
 - track progress
-

A personal archive

Users can store:

- books
 - documents
 - notes
 - creative projects
 - research material
-

A creative workspace

Users can create:

- fantasy worlds
 - novels
 - RPG campaigns
 - personal projects
-

A discovery platform

Users can:

- discover books
 - follow creators
 - explore public projects
-

4. WHAT LUMINA CHRONICA IS NOT

This section is important to prevent wrong implementations.

Lumina Chronica is NOT:

Not only an ebook reader

A simple PDF/EPUB viewer is not enough.

The reader is only one part of the ecosystem.

Not only a social network

Community features are important but are not the main purpose.

The focus is:

Personal library first.

Not an enterprise document management system

The application should remain approachable and personal.

Not a complicated productivity tool

The user should feel:

"I own a beautiful digital library."

Not:

"I manage a database."

5. CORE DESIGN PHILOSOPHY

5.1 Emotional goal

The application should create the feeling of:

- entering an old library
 - opening a valuable book
 - discovering something new
 - building something personal
-

5.2 Design keywords

The complete design should communicate:

Warm

Examples:

- parchment colors

- soft contrasts
 - comfortable reading
-

Intelligent

Examples:

- clean organization
 - meaningful information
 - structured layouts
-

Creative

Examples:

- worldbuilding tools
 - customization
 - personal expression
-

Timeless

Examples:

- classic typography
 - elegant layouts
 - avoiding short-lived trends
-

6. NON-NEGOTIABLE PRINCIPLES

These principles must always be respected.

6.1 User First

Every feature should answer:

Does this improve the user's experience?

Avoid:

- unnecessary complexity
 - features only because they are technically interesting
-

6.2 Privacy First

Default visibility:

PRIVATE

Nothing becomes public automatically.

Users decide:

- who sees content
 - whether content is shared
 - whether content is published
-

6.3 Modular Architecture

The application must allow future growth.

Features should be separated into modules:

Example:

Reader Module

Library Module

Project Module

Community Module

AI Module

6.4 Free and Accessible

The initial project goal:

- free hosting
 - low operational costs
 - open development
-

7. OPEN SOURCE STRATEGY

7.1 Repository Visibility

Lumina Chronica should have a public GitHub repository.

Reasons:

- portfolio value
 - transparency
 - learning
 - community feedback
-

7.2 Development Control

Although the repository is public:

Development remains controlled.

Rules:

- anyone can view the code
 - anyone can create issues
 - anyone can suggest improvements
 - pull requests are reviewed
 - maintainers decide what is merged
-

7.3 Contribution Philosophy

Feedback is welcome.

External contributions are welcome.

However:

Quality and project direction have priority over accepting every change.

8. TARGET USERS

8.1 Readers

Primary users.

Needs:

- comfortable reading
 - organization
 - discovery
 - progress tracking
-

8.2 Writers and Creators

Users who create:

- novels
- fantasy worlds
- RPG campaigns
- creative projects

Needs:

- structure
 - documentation
 - organization
-

8.3 Students

Uses:

- textbooks
 - notes
 - learning material
 - knowledge archive
-

8.4 Community Users

Users who:

- discover content
 - follow creators
 - share works
-

9. SUCCESS CRITERIA

Lumina Chronica is successful when users say:

"This feels like my own personal library."

The application should make users want to:

- return regularly
 - organize their books
 - continue reading
 - create new projects
-
